SUMMARY

Computer Science undergraduate graduated May 2026 with four software engineering internships building scalable backend systems using Node.js, Python, and C++. Experienced in backend development, distributed systems, REST APIs, and AI-powered applications using LLMs and agentic workflows. Passionate about building scalable software and AI-enabled solutions.

SKILLS

- **Programming Languages:** Java, C++, Python, JavaScript
- **AI & Intelligent Systems:** LLMs, LangChain, LangGraph, AI Agents
- **Backend Development:** Node.js, Express.js, FastAPI, REST APIs, Microservices, Serverless Architecture
- **Databases:** PostgreSQL, MySQL, MongoDB, AWS DynamoDB
- **Cloud & Tools:** AWS, Google Cloud, Docker, Git, GitHub, Linux, Postman

EXPERIENCE

Virtusa Consulting Services Pvt. Ltd

Mar 2026 – May 2026

Intern

- Architected a full-stack market intelligence platform (FastAPI + Next.js) with a **7-stage async pipeline** aggregating data from **9+ external source families** (news, financial, social, GitHub, security) into LLM-synthesized, citation-backed PDF reports.
- Built a **multi-layered prompt safety system** with risk-scoring and injection detection, plus a **4-tier database fallback** (Supabase → Postgres → SQLite) ensuring zero pipeline downtime under LLM or API failures.

Secure Blink Tech Private Limited

Sep 2025 – Nov 2025

Backend Developer Intern

- Managed a large **distributed, multi-tiered serverless backend** with **50+ microservices**; diagnosed and resolved **12+ production issues** and contributed to the **AWS SDK v2 to v3 migration** for improved compatibility and maintainability.
- Designed and Developed business logic for **AWS Marketplace integration**, working through ambiguous, broadly-defined requirements to deliver the end-to-end integration flow.

National Institute of Technology Warangal

May 2025 – Jul 2025

Research Intern

- Designed **MediLocker**, an AI-powered decentralized health locker built on a **distributed storage architecture**; standardized health records into **HL7 FHIR**-compliant EHRs aligned with **ISO 13606, HIPAA, and GDPR**.
- Implemented distributed storage using **IPFS, DID-based authentication, Hyperledger Fabric**, and an **AI-powered OCR pipeline** to improve secure storage, interoperability, and auditability of electronic health records.

Vitacure Healthcare Private Limited

Apr 2025 – Jul 2025

Backend Developer Intern

- Designed and developed **REST APIs** for an intelligent caregiver booking system inspired by ride-hailing platforms, matching patients with nearby caregivers based on location, availability, and service requirements.
- Built backend modules for **caregiver discovery, booking assignment, and booking state management** using **Node.js, Express.js, and PostgreSQL**, with secure authentication and role-based authorization.

PROJECTS

FINTRO ([GitHub](#)) | FastAPI, Node.js, PostgreSQL, Prisma, LangGraph, LangChain, Supabase

- Built an **autonomous CFO platform** powered by **7 specialized LangGraph agents** for cash flow forecasting, risk detection, and liquidity analysis over a **13-week horizon**.
- Designed a **shared-state multi-agent architecture** enabling agents to reason over financial trade-offs and explain decisions, replacing static dashboards with proactive, explainable recommendations.

REPURPO.AI ([GitHub](#)) | Next.js, TypeScript, FastAPI, Google ADK, PostgreSQL, WebSockets

- Built a **multi-agent Durg Repurposing** platform that orchestrates 6 specialized agents to autonomously analyze clinical trial outcomes, scientific literature, patent landscapes, pharmacovigilance data, and market intelligence for repurposing decisions.

EDUCATION

Kakatiya Institute of Technology and Science, Warangal

Oct 2022 – May 2026

B.Tech in Computer Science and Engineering (Networks) CGPA: **8.41 / 10.00**

Warangal, Telangana

Relevant Coursework: Data Structures, Algorithms & Complexity Analysis, Database Management Systems (DBMS), Operating Systems, Computer Networks, Network Security, Object-Oriented Programming (OOP), Software Engineering

ACHIEVEMENTS

- Semifinalist – **Top 60** out of **34,000+ participants** at Nest 2.0, organized by Novartis.
- **Top 50 Finalist** among **1,600+ participants** at DeepDive 1.0, organized by Mercer Mettl.
- Ranked **3,430** out of **5.73 Lakh+ participants** in TCS CodeVita 2024.
- **Finalist** at Agentathon 2025 by Google Developer Groups for building an **Agentic AI solution**.
- **Regional Finalist** at NASA Space Apps Challenge 2024 for data optimization.
- Pitched Vitacure at IIT Roorkee; secured **Top 200 Startup** at Techfest IIT Bombay 2025.
- Ranked **#317** out of **27,000+** in GSSoC 2024 with **3 merged pull requests** and 2 backend contributions.
